

OILY SKIN TREATMENT PROTOCOL

Step 1:

HYDRODERMABRASION with SalicPure Serum

Use dual diamond moderate vacuum suction to gently exfoliate and refresh the skin.

Step duration: 10 minutes

Step 2:

Electroporation with VitaLuster Vitamin C serum

Step duration: 10-15minutes

Step 3:

Oxygen Application to deeply infuse serums and boost collagen production. Add 3-5ml of the VitaLuster Vitamin C serum (rich with peptides and hyaluronic acid) to the oxygen gun container. Perform the Oxygen Infusion facial using slow circular motions.

Step duration: 5-8 minutes

Step 4:

Colling therapy with FirmingGenius Peptide Conductive gel

Step duration: 10 minutes

Step 5

Apply moisturizer and sunscreen SPF 40.
